

▶ OVEN LINE

Roto Classic rack oven for bread and pastry

80 years of experience rotate around this oven

Strong with its own major technological evolution, the rack oven Rotodrago Classic is today the reference mark for performance and reliability.

▶ COMPONENTS

Polin experience in service of functionality

Combustion chamber **1** is made with a big radiant surface, thanks to the big quantity of pipes and the peculiar shape of fumes circuit.

This solution, together with thick refractory st/st structure, grants:

- high efficiency
- low consumption rates
- long-term durability

The big steam generator **2**, extending the entire interior width of the oven, guarantees a big supply of steam.

The automatic steam distribution system managed by software, in combination with constant pressure baking, keeps the surface of the product moist for a long period of time.

ROTO CLASSIC

Extreme feeding versatility: methane, lgp, gasoil, electricity.

Double-glass window with compass opening system for easy cleaning. **3**

The double stainless/silicon rubber seal on the vertical and upper wells of the door guarantees a perfectly hermetic seal. **4**

The door with double-glass has a strong and ergonomic exterior handle, to grant a perfectly hermetic seal, and an interior safety handle. **5**

The rack hooking device is made entirely out of a casting with rounded profile and large cross section (platform optional, for racks with different heights). **6**

The smooth floor makes it easy to clean inside and make the entrance of the rack easier.

Compact size for more versatility. **7**

ROTO CLASSIC

Small details, big difference

- Stainless steel side panels 8
- Automatic vapor exhaust dumper for easier and even bakings
- Stronger electric group to further increase productivity
- Stronger steam generator to further increase steam output
- Automatic lifting device for heavy racks (up to 400 kg) 9
- Rack platform
