CENTURYDonut Production System

INDUSTRIAL STRENGTH DONUT PRODUCTION LINES FOR COMMISSARY BAKERIES, CENTRAL PRODUCTION PLANTS, AND MID-TO-LARGE SCALE DONUT PRODUCERS

FRYER MODEL	FRYING AREA			FRYER CAPACITY (Standard size donuts, at 110sec. frying time (SEE NOTE BELOW)		
(Either gas or electric)	Plan of frying area	Frying Length	Frying Width	Std. Donuts per pocket		Production rate
Century C6-16		6′ (1.83m)	16" (41cm)	4	0000	125 doz/hr
Century C6-24		6′ (1.83m)	24" (61cm)	6	000000	187 doz/hr
Century C10-16		10' (3.05m)	16" (41cm)	4	0000	246 doz/hr
Century C10-24		10' (3.05m)	24" (61cm)	6	000000	374 doz/hr
Century C10-36		10′ (3.05m)	36" (91cm)	8	00000000	497 doz/hr
Century C14-24		14' (4.27m)	24" (61cm)	6	000000	547 doz/hr
Century C14-36		14' (4.27m)	36" (91cm)	8	00000000	730 doz/hr

NOTE: Production rates assume full capacity and should be considered as estimates only. Production rates are estimated at a frying time of 110 seconds, with 4½" wide pocket spacings and using one turner only. Production rates will vary according to frying time, the size of your donuts, the number of turners, the pocket spacing of the fryer, the type of depositor used, and the percentage of full capacity achieved in operation. Always consult a Belshaw industrial sales manager to estimate production rates based on your expected conditions.

Century C6-24 — 6 ft. fryer, 6 standard donuts per pocket, shown at right with MDDRF-6 cake donut depositor. C6-24 is a gas-only fryer.

Century C10-24 — 10 ft. fryer, 6 standard donuts per pocket, shown frying raised donuts. Gas and electric models available. Conveyor hoist is standard. (Hood

Century C10-36 — 10 ft. fryer, with 36" width for 8 donuts per pocket. Gas only with conveyor hoist standard. All models C10-24 and higher (gas and electric) incorporate this same overall design.

14 ft. fryer, holds 6 donuts per pocket, with conveyor hoist standard. 14 ft. gas only fryer, holding 8 donuts per pocket, with conveyor Century C14-24

MS MultiSpace Cake Donut Depositors

INDUSTRIAL STRENGTH DEPOSITORS FOR COMMISSARY BAKERIES, CENTRAL PRODUCTION PLANTS, AND HIGH VOLUME WHOLESALE BAKERIES

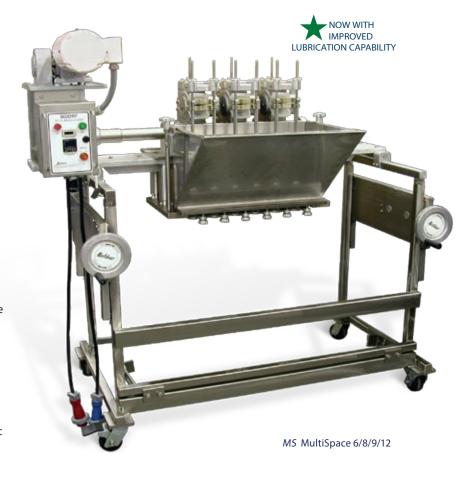

Belshaw Cake Donut Depositors have been an industry standard for automated donut production for decades. The *MS* MultiSpace depositor, together with the wide selection of Belshaw donut plungers, provides the flexibility to produce a wide variety of cake donuts. Durable construc - tion enables the MultiSpace depositor to produce consistent cake donuts – time after time – over years of continuous service.

The MS MultiSpace design allows producers to choose how many donuts to deposit per cycle. For medium, small or miniature donuts, the base of the depositor can be changed to allow more donut deposits, in order to fill the entire fryer width. Donut production capacity can be increased by up to 33% when using the MultiSpace system.

Features in brief

- Models available to fit donut fryers 18" to 50" in frying width
- Roto-Flex system allows weight adjustments while machine is running
- Fast, no-tools-required clean-up
- Automatic synchronization with donut fryer
- Electronic Deposit Counter option will stop the depositor after a pre-selected number of deposits are completed
- Batter pouring chutes available
- Can be synchronized with non-Belshaw automatic fryers
- Improved lubrication capability
- NSF-listed

CENTURYThermomatic Proofers

INDUSTRIAL STRENGTH PROOFERS FOR COMMISSARY BAKERIES, CENTRAL PRODUCTION PLANTS, AND MID-TO-LARGE SCALE DONUT PRODUCERS

CENTURY THERMOMATIC PROOFER

Belshaw's Thermomatic (TM) Proofers, designed in concert with our Century Fryers, are manufactured with the goal of improving your efficiency. The TM Proofer automatically controls the proofing environment to ensure each donut receives virtually identical proofing, improving product consistency and yield.

Flexibility and durability are hallmarks of the Belshaw TM series. Three proofer widths, with several length, height, infeed and outfeed options, allow Belshaw to conform a proofer to your specific requirements.

The TM Proofer minimizes labor requirements by automating donut production. Donuts can be automatically transferred, placed or cut directly onto the proofing trays. The trays are then carried through the electronically controlled proofer environment automatically, at a speed synchronized to the fryer, ensuring a virtually identical proof for each donut.

The TM Proofer requires little knowledge or experience to operate reliably. You can rely on the TM Proofer to maintain the environment you select – and produce consistent results.

The TM Proofer series is ideal for supervising your production. Large clear windows allow viewing the donuts as they travel through the proofer.

Belshaw's Dustless Proofing option eliminates the need to

put flour on the proofer trays. Donuts are transferred cleanly using Belshaw's active release system. The Dustless Option improves quality and saves money, by extending shortening life and reducing cleaning labor.
