EZMelt 24 Shortening Melter-Filter (w/optional Refill Hose)

EZMelt 34 Shortening Melter-Filter (w/optional Refill Hose)

Description

Belshaw's EZMelt shortening melter-filters effectively clean and recycle shortening in any fryer with capacity up to 37 gallons (138 Liters).

The advantage of a recycling filter that heats shortening

- If zero trans fat shortenings are used, they gradually become thicker at normal bakery temperatures. This can lead to pump blockages and failures with standard filters. Using the heated EZ Melt overcomes this problem.
- Pumping reheated shortening through a fixed connection to the fryer is faster and safer than any other method, such as dropping in shortening blocks. The EZMelt does this using a refill hose (optional) which attaches directly to a Belshaw fryer.

Standard features

- Slides under compatible floor and tabletop fryers
- Compatible with Belshaw's Floor Model fryers, Donut Robot® fryers, Insider Clean Air Cabinet, and Snack Master.
- Can be used with any donut shortening, including Zero Trans Fat shortening
- Heating element with factory set thermostat to 225°F/107°C. Element tilts up for easy tank cleaning.
- Long-life synthetic filter screen that needs only annual replacement under normal conditions.
- Heavy duty pump & motor for pumping shortening to the fryer on

demand

- Moisture repellent foot switch for activating pump
- Cube cutter for fast melting of solid shortening blocks up to 50lbs (22.7kg)
- Detachable, hand held rinse hose with plated steel nozzle and heat resistant handle.
- High-temperature limit switch
- Heavy duty stainless steel frame, tank and casters
- Certified by ETL to NSF-4, CSA-C22.2, and UL-1889

Options

- Numerous worldwide voltages (see over page)
- Refill Hose (see above photos). Heat resistant hose with plated steel nozzle designed to attach to designated Belshaw fryers. The quickest and safest method of refilling the fryer when shortening level is low.
