

Belshaw Pressure Cutter

- 4, 5 or 6 cutters
- Cuts rings and shells
- Synchronizes with all automatic proofers
- In-motion cutter adjustment
- A.S.M.E. certified pressure vessel
- All stainless steel construction
- Menu-driven PLC touch-screen control
- Full-access hopper for fast, easy refill and cleanout

If you are a producer wanting to run extruded yeast-raised donuts on a 4, 5 or 6-across donut system, the Belshaw Pressure Cutter is the answer you have been waiting for. Belshaw has introduced features that make pressure-cut raised donuts efficient for production up to 600 dozen per hour.

First, the Belshaw Pressure Cutter is PLC-controlled, with a menu-driven touch screen. The PLC can adjust product weights with precision while the cutter is still running. The touch screen controller also allows the operator to make use of centralized batch counting and target setting.

A second new feature is the Belshaw Pressure Cutter's hopper design. The entire area is without corners and immediately visible and accessible below the full sized hatch. The hatch itself releases quickly in a single motion. The results are fast refills and a minimum of production delay.

The Pressure Cutter is adaptable for 4, 5, or 6 cutters. Cutter sizes are available for a range of product weights and dimensions. It is a robust machine manufactured to Belshaw's standards of high product quality and long service life.
